

# Bulk Price Update

The **Bulk Price Update** feature allows you to update the prices of multiple products at once using an Excel file.

## Steps to Update Product Prices in Bulk

1. Go to **Products ? Update Price**
2. Click to **Download the Excel File**
  - The file will contain:
    - **Product Names**
    - **SKUs**
    - **Current Selling Prices**
    - **Selling Group Prices** (if any)
3. Open the Excel file and **update the prices** for the required products
4. Save the file and **upload it back** into the system
5. Click **Submit** to apply the changes

**Do not change** the product names, SKUs, or any of the **column headers** in the Excel file.

Any modification to these fields may result in errors or skipped entries during the update process.
