

Custom Labels for Products

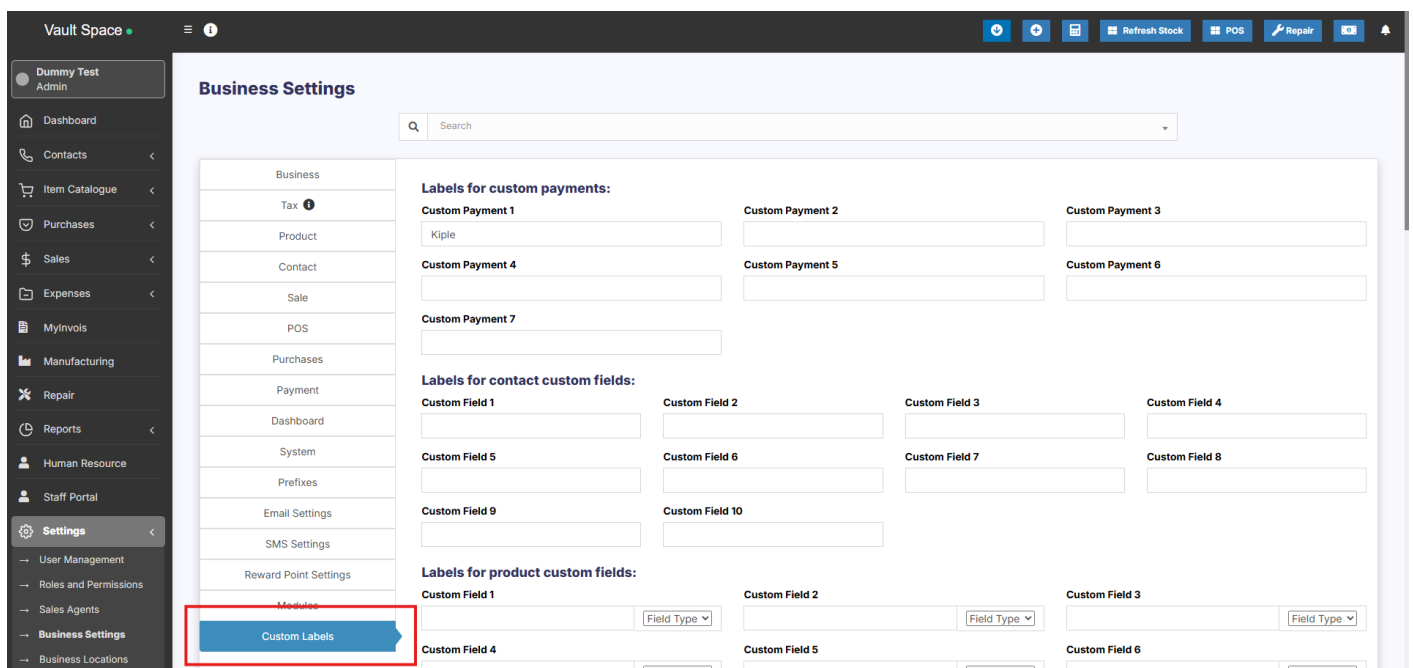

Custom Labels for Products:

20 custom fields can be added for the product, these custom fields can be used while adding a new product.

Custom fields can be anything related to the product like brand code, product code etc.

To add this **Go to Settings > Business Settings > Custom labels**

Provide the custom label name here.

The screenshot displays the 'Business Settings' page in the Vault Space application. On the left is a dark sidebar menu with 'Settings' expanded to show 'Custom Labels' highlighted in blue. The main content area is titled 'Business Settings' and contains a search bar and a list of settings categories on the left. The 'Custom Labels' section is active, showing three categories of fields: 'Labels for custom payments' (7 fields), 'Labels for contact custom fields' (8 fields), and 'Labels for product custom fields' (6 fields). Each field has a text input for the label name and a dropdown menu for 'Field Type'. The 'Custom Labels' link in the sidebar is highlighted with a red box.

Field Type for labels:

The data type can be specified for each custom field. Select text, date picker or dropdown types.

For dropdown add a line break after each option.
