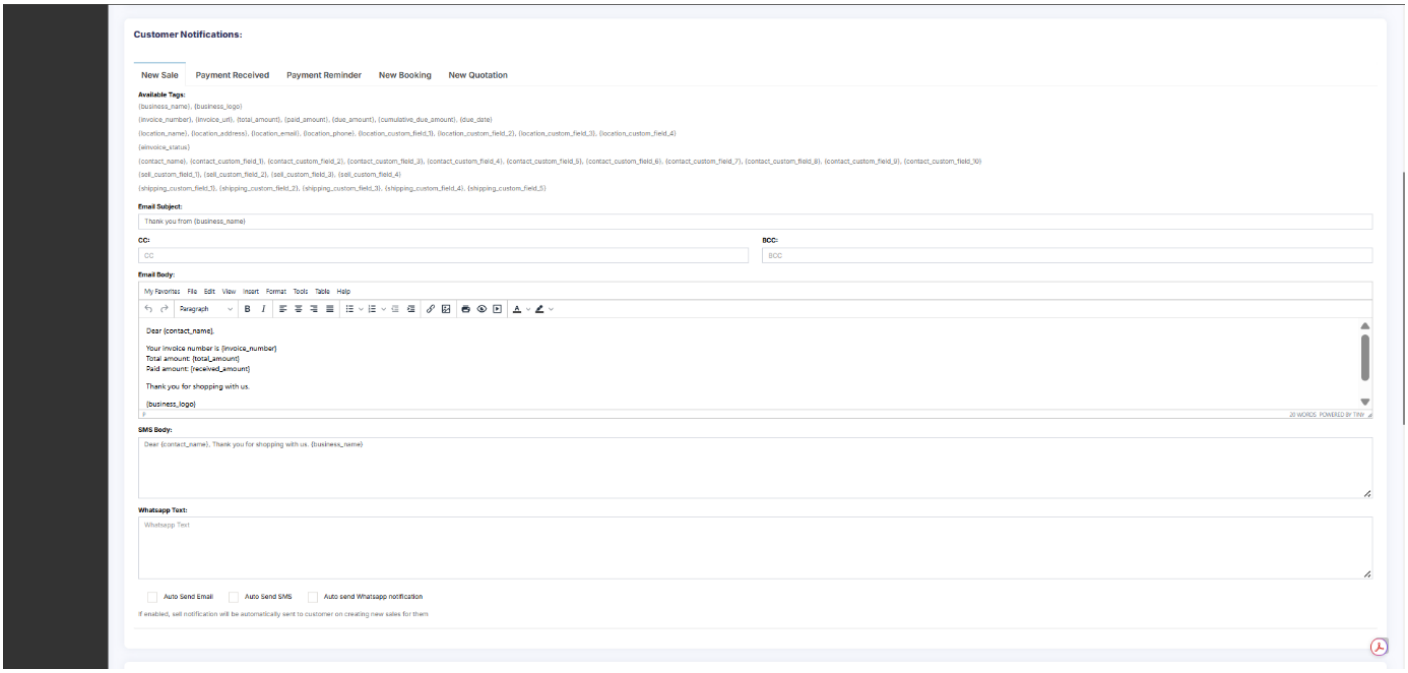
Enable or Disable Auto Sending of notifications

Enabling auto-sending of SMS & Email to customer on New Sales:



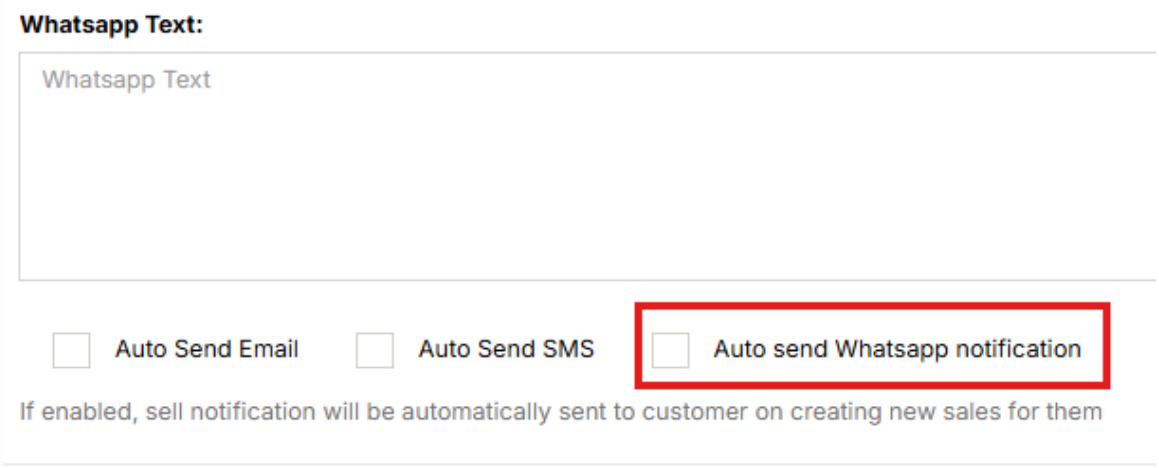
1. First, setup the Email SMTP and/or SMS details in Business settings.
    1. SMS Documentation
    2. Email SMTP Documentation
2. Go to **Notification Template**
3. Under **Customer Notification** you will see **New Sales** notification.
4. There you will find the option to enable **Auto Send Email** & **Auto Send SMS**, enable it and save.
5. Now when ever you make a sales a Email or SMS notification will be send to customer.

> If there is any error in Email or SMS configuration then sales will not get submitted, so test it properly.

> Email notification will only get send in case the customer have a valid email present

> Similarly SMS will only get send if the mobile number is present.

Enabling auto-sending of Whatsapp Notification on New Sale:



To enable automatic WhatsApp notifications, enable the '**Auto send Whatsapp Notification**' check box under **Customer Notification > New Sale.**
