

# Product Warranty

## Enabling Warranty:

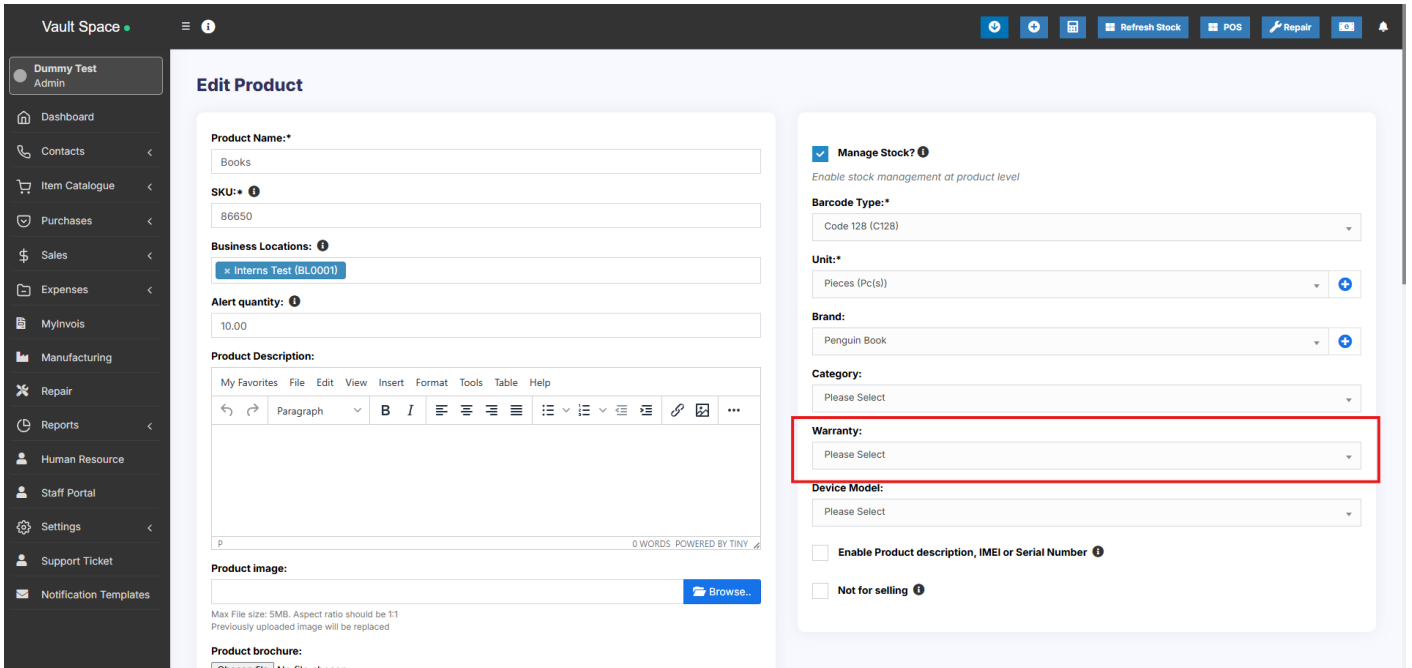

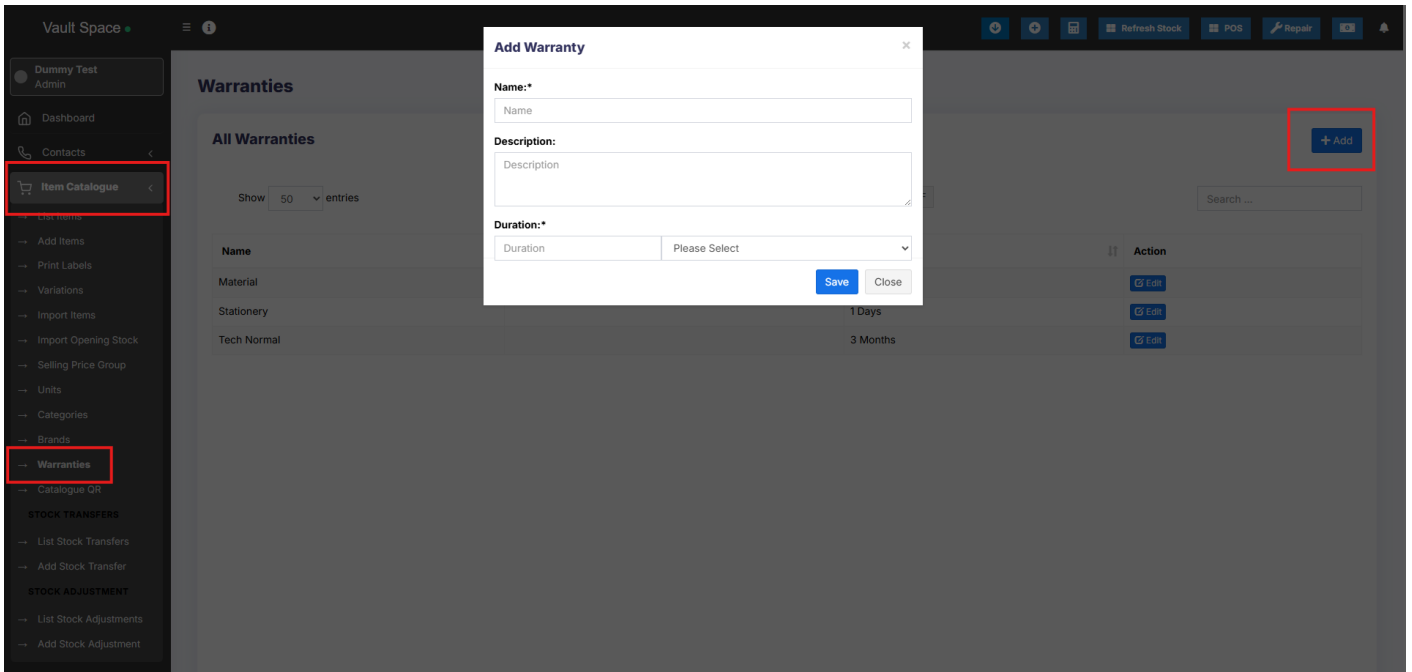

To enable warranty in products go to **Settings -> Business Settings -> Products -> Enable Warranty**

## Using Warranty

1. **Adding Warranty:** Add warranty types by going to **Products -> Warranty**.
2. **Assigning warranty for products:** Go to Add/Edit product and select the warranty that is applicable for the product.
3. **Sell with warranty:** Any products which has warranty assigned when sold will use the transaction date as start of warranty. You can display warranty in receipts by enabling it from Invoice layout.

The screenshot displays the 'Business Settings' page in the Vault Space application. The left sidebar shows a navigation menu with 'Settings' expanded to 'Business Settings'. The main content area is titled 'Business Settings' and features a search bar. A vertical list of settings categories is on the left, with 'Product' selected and highlighted in blue. The 'Product' settings are divided into several sections: 'SKU prefix' (with a search input), 'Enable Product Expiry' (with 'Add item expiry' checked), 'On Product Expiry' (with 'Stop Selling n days before' set to 2), 'Default Unit' (set to 'Pieces (Pc(s))'), and 'Enable Warranty' (checked and highlighted with a red box). Other options include 'Enable Brands', 'Enable Price & Tax info', 'Enable Racks', 'Enable Categories', 'Enable Sub-Categories', 'Enable Sub Units', 'Enable Row', and 'Enable Position'. The 'Stock Transfer Settings' section at the bottom includes 'Disable Stock Transfer Prices' and 'Is Product Image Required?'.
