

Branch

Create New

After clicking on "Add New Branch" a modal will open where you need to fill in the required information. Once completed, click the "Save" button. The new branch will be created successfully, and you will be redirected to the branch list. If you are logged in to a branch, the name of that branch will be displayed in the header.

• Previously, you didn't have a branch section. So, when you create your first branch, another branch will be automatically created using your company/business name.
Example: If your company/business name is **Acnoo**, When you create your first branch, another branch will automatically be created with the name **Acnoo**.

• All your previous data will be preserved when you create a new branch.

• You cannot delete the automatically created branch.

×

filter branch data. Therefore, the automatically created branch cannot
